Report Methodology
TerraCRG's 2024 Brooklyn Market Report includes investment sales property transactions recorded from January 2024 through March 2024. Asset types analyzed in the report include Multifamily, Mixed Use, Retail, Industrial, Office, Development \& Special Use transactions. Recorded transaction sources include NYC.gov Rolling transactions data in conjunction with transactions data from PropertyShark, most have been fact checked by our TerraCRG team. Transactions under $\$ 200,000$ have been omitted from the report. Property types include only investment sales properties. Multifamily transactions include buildings with five residential units and up; no commercial use component. Mixed Use transactions include buildings with both residential and commercial use components. Retail transactions include NYC Class K, O6, G3, G4 \& G5 buildings and retail condominiums. Industrial transactions include NYC Class E, F, G \& L buildings; only commercially zoned buildings (M or C zoning) are accounted for. Office transactions include NYC Class O buildings and office condominiums. Development transactions include residentially zoned land, and under-developed residentially zoned buildings. Special Use transactions include assets that do not specifically fall under the aforementioned asset types. Special Use assets include but are not limited to hotels; commercially zoned vacant land; hospitals; religious structures; and educational structures. If neighborhoods are not included in the individual product type transactions breakdown, there were no recorded transactions that fit our study criteria in that neighborhood.
